

# PROGRAM

Thursday 22.06.2017

## Academy Building

**Bruinszaal**      **1111.0016**

**Offerhauszaal**    **1112.0347**

## Harmony Building

**Marie Lokezaal**    **next to 1313.0007**

**Weberfoyer**      **next to 1313.0007**

<b>08:00 - 17:00</b>	Registration @ entrance Academy building – coffee available between 8 and 9 in Bruinszaal
<b>08:55 - 09:00</b>	Opening
<b>09:00 - 10:00</b>	First keynote speaker – Prof. Risto Näätänen “The mismatch negativity (MMN) as a unique index of decreased brain plasticity in different cognitive brain disorders” Offerhauszaal
<b>10:00 - 10:05</b>	Short Break
<b>10:05 - 11:20</b>	Flash presentations Offerhauszaal
<b>Move to Harmony Building</b>	
<b>11:20 - 11:45</b>	Coffee break Weberfoyer
<b>11:30 - 13:00</b>	Poster Session 1 Marie Lokezaal and Weberfoyer
<b>12:45 - 14:00</b>	Lunch Weberfoyer
<b>Move to Academy Building</b>	
<b>14:15 - 15:15</b>	Second keynote speaker – Prof. Anna Papafragou “Evidence and information in language and thought” Offerhauszaal
<b>15:15 - 15:20</b>	Short Break
<b>15:20 - 16:35</b>	Flash presentations Offerhauszaal
<b>Move to Harmony Building</b>	
<b>16:35 - 17:00</b>	Coffee break Weberfoyer
<b>17:00 - 18:30</b>	Poster Session 2 Marie Lokezaal and Weberfoyer
<b>18:00 - 18:30</b>	Drinks and poster prize award ceremony Weberfoyer
<b>19:00 - 01:00</b>	<b>Conference dinner and party Plaza Danza</b>

## Friday 23.06.2017

Academy Building	
<b>09:00 - 10:00</b>	Third keynote speaker – Prof. Bart Geurts “Making sense of self talk” Offerhauszaal
<b>10:00 - 10:30</b>	Coffee break Bruinszaal and Lounge
<b>10:30 - 11:30</b>	NWO Open Access Session by Drs. Ane van der Leij Offerhauszaal
<b>11:30 - 12:45</b>	Flash presentations Offerhauszaal
Move to Harmony Building	
<b>12:45 - 14:15</b>	Lunch Weberfoyer
<b>13:30 - 15:00</b>	Poster Session 3 Marie Lokezaal and Weberfoyer
Move to Academy Building	
<b>15:15 - 16:15</b>	Fourth keynote speaker – Willem (Jelle) Zuidema “Neural Grammars: building models that take both the brain and language seriously” Offerhauszaal
<b>16:15 - 16:30</b>	Closing with poster prize award ceremony Offerhauszaal
<b>16:30 - 17:00</b>	Drinks Bruinszaal and Lounge

## Session 1 Thursday

**Flash Presentations**                      **10:05 - 11:20**                      **Offerhauszaal**                      **1112.0347**

**Poster Session**                              **11:30 - 13:00**                      **Marie Lokezaal**

- |     |                       |  |
|-----|-----------------------|--|
| A1  | Amélie la Roi         | Idioms in the aging brain: The effects of age-related cognitive decline on the processing and comprehension of idioms                  |
| A2  | Angelo Basile         | Writing like the Holy Mary: a stylometric analysis of a christian apparitional phenomenon in Bosnia                                    |
| A3  | Anne Merkuur          | Productivity drives spreading: The case of Frisian past participles  |
| A4  | Assunta Süss          | Pupillometry and syntactic agreement: Sentence processing by German speakers   |
| A5  | Curt Anderson         | The lexical semantics of role-denoting relational adjectives   |
| A6  | Denise Zijlstra       | Iconicity and Phonological Processing in Sign Language Production  |
| A7  | Ellie van Setten      | Reading and Spelling in Dutch and English as a Second Language in Adolescents with a Familial Risk of Dyslexia                         |
| A8  | Evelyn Bosma          | Verbal working memory and the acquisition of cross-linguistic phonological regularities  |
| A9  | Gert-Jan Schoenmakers | Across 'yesterday' or 'not': Adverb type in Dutch scrambling   |
| A10 | H. van 't Hul         | Evaluation of a corpus building tool for annotated multimodal instructions   |
| A11 | Jelke Bloem           | Verb cluster word order in Early-Modern Frisian  |
| A12 | John Hoeks            | Convincing Conversations: Can a Dialogue System Make you Vegan?  |
| A13 | Juliana Feiden        | Grammatical and conceptual pronoun number agreement processing in Brazilian Portuguese: An ERP study                                   |
| A14 | Karima Ben Abbes      | The role of typological proximity in the acquisition of a third language (L3)  |
| A15 | Karliën Franco        | Excusing my French/Latin/German. Modelling geographical and semantic structure in the use of loanwords in dialectal varieties of Dutch |
| A16 | Lasha Abzianidze      | The Parallel Meaning Bank  |
| A17 | Maria Melissourgou    | Understanding exam genres: a contrastive, corpus-based analysis  |
| A18 | Martina Caccia        | Music and language in children with Developmental Dyslexia: relationships between musical perception and the syntax-prosody interface  |
| A19 | Michelle Meier        | The coordination of word initial consonant clusters in Georgian  |
| A20 | Mieke Slim            | Disjunction under Negation: A study with Dutch pre-schoolers   |
| A21 | Muging Li             | First things first: cross-linguistic analyses of event apprehension  |
| A22 | Nermina Cordalija     | The Processing of Unaccusative Verbs: A Cross-Modal Lexical Priming Study  |
| A23 | Nienke Meulman        | Perception and production of constructions unique to L2: assessing grammatical proficiency using multiple measures                     |
| A24 | Rafał Jończyk         | Preparing for the worst may not be that bad in a second language mode: An ERP study on emotional anticipation in bilingualism.         |
| A25 | Sandra Hansen-Morath  | Analyzing the variation in verb number in contemporary German with regression analysis   |
| A26 | Tamara Butigan        | Trajectories in Analyses of Self-Translation   |
| A27 | Zou Qin               | The epistemic implicature in Mandarin A-not-A questions  |

## **Session 2 Thursday**

**Flash Presentations**                      **15:20 - 16:35**                      **Offerhauszaal**                      **1112.0347**

**Poster Session**                              **17:00 - 18:30**                      **Marie Lokezaal**

- |     |                              |   |
|-----|------------------------------|---|
| B1  | Aida Salcic                  | Does distance between agreeing elements influence gender agreement processing in Dutch? An ERP study  |
| B2  | Alla Abrosimova              | Argument Structure in Deverbal Compounds  |
| B3  | Anna Pot                     | Aging in an L2 context: A linguistic perspective on older migrants' L2 use, health, and wellbeing   |
| B4  | Aviya Hacohen                | On the pragmatics of compositional (a)telicity: a psycholinguistic study  |
| B5  | Cong Feng                    | Do you see when you read? Mental simulation of visual features during L1 and L2 reading comprehension   |
| B6  | Daniela Palleschi            | What's in a Name?: Neural processing of temporal violations through extralinguistic time reference  |
| B7  | Dorothee Hoppe               | Before or After? Suffixes outperform prefixes in discrimination of complex L2 categories  |
| B8  | Felicia Bisnath              | A Diachronic Study of the Transparency of Sranan Tongo  |
| B9  | Frea Waninge                 | Emotion and Motivation  |
| B10 | Gabi Danon                   | Names, possession and modification in the Hebrew construct state  |
| B11 | Hamed Rahmani                | Persian 'word stress' is a syntax-driven tone   |
| B12 | Hasmik Jivanyan              | An account of syntactic and pragmatic differences in terms of unifying semantic features: The case of <i>parce que/because</i> and causal relations |
| B13 | Jie Fu                       | A Corpus Study on Metaphor Use in Aphasia   |
| B14 | Julija Danu                  | Social language variation through the perception of modern Russian citizens   |
| B15 | Lotte Verheijen              | Transgender Representation in the Dutch National Press: 2007–2016   |
| B16 | Maria Melissourgou           | Changing trends in research articles: investigating informality.  |
| B17 | Masha Medvedeva              | Large-Scale Language Identification for Closely Related Languages   |
| B18 | Michaela Strinzel            | Acoustic Analysis of Vowel Articulation in Parkinson's Disease with Mild Cognitive Impairment   |
| B19 | Miguel Santin                | Does the result justify the means? The representation of resultative events in Mandarin and Spanish.  |
| B20 | Mirjam Günther- van der Meij | Does degree of bilingualism influence trilingual word recognition?  |
| B21 | Nermina Cordalija            | Phrasal or clausal conjunction? – postverbal conjoined subjects in Bosnian/ Croatian/ Serbian: an experimental study                                |
| B22 | Pauline Veenstra             | Automatic Speech Recognition (ASR) efficacy for congenitally blind vs. sighted speech   |
| B23 | Sandra Hansen-Morath         | Identifying quality differences in low vowels in German with linear mixed models and logistic regression  |
| B24 | Steven Gilberts              | "It ain't nuthin' but a 'G' thang": Rap flows as evidence for the connection between language and music   |
| B25 | Theresa Redl                 | Gender inferences based on stereotypes and a generic masculine pronoun: Does Dutch <i>zijn</i> 'his' induce a male bias?                            |
| B26 | Ulrike Ackermann             | Narrative Practices of (Self)Presentation: How Companies present themselves in Web Formats  |

## **Session 3 Friday**

**Flash Presentations**      **10:30 - 11:45**      **Offerhauszaal**      **1112.0347**  
**Poster Session**            **13:45 - 15:00**      **Marie Lokezaal**

- |     |                              |  |
|-----|------------------------------|--|
| C1  | Ana Bosnic                   | Exhausting <i>po</i> – Spatial and individual distribution in Serbian  |
| C2  | Bregtje Seton                | Out of use, out of mind? The age effect in first language attrition  |
| C3  | Ciara Hobbelink              | How much are we influenced by linguistic habituation? The representation of resultative events by Dutch adults and children.   |
| C4  | Curtis Sharma                | The effect of bilingualism on the distribution of ASD and ADHD traits in a general sample of primary school children   |
| C5  | Emma Strating                | How Speech Production Declines with Age: an EEG Study  |
| C6  | Emma Zaal                    | From Omnivore to Herbivore: Explaining Vegetarianism and Veganism Among American Students applying a Reasoned Action Approach  |
| C7  | Felicity Frinsel             | Cross-language effects on the disambiguation of homonyms   |
| C8  | Friederike Charlotte Hechler | The Role of Rhythm in Speech Perception. Research Proposal   |
| C9  | Gareth Dwyer                 | Neural approaches to Authorship Attribution  |
| C10 | George Krasovitsky           | The diachrony of case syncretism revisited   |
| C11 | Jane Mertens                 | How does ageing affect articulatory coordination in simple and complex syllable onsets?  |
| C12 | Jeffrey Pheiff               | The Zero Article in the Dialects of Groningen  |
| C13 | Joëlle Ooms                  | Sympathy with someone similar  |
| C14 | Leanne Nagels                | The processing of lexical and contextual information in cochlear implant users   |
| C15 | Lena Kremin                  | The Effect of Rhythmic Class on Vowel Categorization by Bilingual Infants  |
| C16 | Lotte van Burgsteden         | To listen or not to listen: verbal and non-verbal displays of reciprocity in meal-time conversations   |
| C17 | Marieke Droogsma             | The effect of the current military conflict in Ukraine on language use and language attitudes.   |
| C18 | Marlisa Hommel               | Perception training in the EFL classroom   |
| C19 | Michael Chiou                | The evidential basis of future tense   |
| C20 | Nienke Hoeksema              | Talking bats: how can they help us understand the neurobiology of language?  |
| C21 | Olga Buivolova               | Sensitivity to different types of cues to identify generics in aphasia   |
| C22 | Pierre Ludmann               | Tense and Aspect in Compositional DRT  |
| C23 | Pouran Seifi                 | The Processing of Relative Clauses in Persian and English: An eye-tracking and Self-paced Reading Study  |
| C24 | Remco Knooihuizen            | F*cking vowels   |
| C25 | Sanne Berends                | Age of acquisition effects in electrophysiological signatures of second language grammar processing: a linear mixed effects regression and generalized additive mixed modelling comparison |
| C26 | Veronika Vadinova            | Semi-automated lexical tests of Alzheimer's narrative speech   |
| C27 | Victoriya Trubnikova         | Is that about not being rude? Politeness issues in second language acquisition   |
| C28 | Vincent Boswijk              | Can Salience be Measured in Pupil Size?  |
