Re: What's it all about

Dear Ms Smith,

This document serves both as a demonstration and as documentation for the  $\LaTeX$  2 $\epsilon$  document class `aibrief2`. This document class is to be used by anyone who is writing official letters in their function as staff members of the *Alfa-informatica* department.

This class `aibrief2` is an extension of the NTG class `brief` made by Victor Eijkhout. You should consult `briefdoc.tex` for additional information about the use of options not described in the current text.

The class `aibrief2` provides the official RuG letterhead. Name and address information of the *Alfa-informatica* department are provided. Therefore you should not use the `\maakbriefhoofd{}{}`  command of the `brief` document class.

The following options can be used to modify the lay-out:

**language options** There are language options for Dutch, English, German, and French. This option influences short captions such as date, and translations for letterhead and country. Dutch is the default.

`kleur` Letterhead will be printed in red.

`clcg` Use department name *CLCG*.

`cl` Use department name *computational linguistics*.

Two header commands complement the default address information:

`\telefoon{}` Specify the four digit telephone number of your office. If this option is omitted, the secretary phone number will be used.

`\email{}` This command is also optional.

Make sure to provide a date. Otherwise,  $\LaTeX$  will provide it for you, and the date will change with the day the document is processed.

To  
 Jill Smith

Date  
 October 7, 1999
